- **Languages:** HTML, CSS, JavaScript, SQL
- **Technologies/Frameworks:** ReactJS, Tailwind CSS, Bootstrap
- **Databases:** PostgreSQL, MySQL
- **Tools & Platforms:** Git, Github, Postman, Figma, VS Code

Work Experience

IT Executive **Apr 2023 - Current**

GA Digital Pvt Ltd *Lucknow, India*

- Collaborated with cross-functional teams, including designers and developers, to ensure **frontend components** aligned with user requirements and enhanced the **user experience.**
- Provided valuable feedback on **UI design** and **responsive elements**, optimizing the layout for 75 districts and improving operational efficiency.
- Developed and tested frontend components for an inventory management system, helping streamline management of assets worth ₹1200 crores by ensuring **responsive performance** and **user-friendly interactions**.
- Led frontend quality assurance efforts, collaborating with backend developers to ensure **smooth integration** and optimal performance across devices.
- Conducted **UI testing and debugging**, resolving issues and improving the accuracy of **User Acceptance Testing (UAT)** to ensure that all applications met design specifications.
- Streamlined the transition from manual to digital processes by creating **user-friendly frontends**, increasing data accuracy through thorough testing and **process optimization**.
- Assisted with **SQL querying** and data validation to support **data-driven decision-making**, ensuring that **frontend interfaces** worked seamlessly with the backend.

Senior Relationship Manager **Jul 2022 - Mar 2023**

ICICI Securities Ltd. *Ghaziabad, India*

- **Led client relationships** and resolved complex issues, applying strong communication and problem-solving skills that are directly transferable to identifying and resolving **UI/UX issues** in web development.
- Managed a customer base of 200+ clients, ensuring consistent service quality—skills applicable to understanding user needs and enhancing the **user experience**.
- Expanded my **SIP (Systematic Investment Plan) Book** by over **33%.**

Projects

- **Acme Notes:** Designed and optimized a responsive **note-taking web application** using **Tailwind CSS**, ensuring **intuitive UI** and seamless **cross-device functionality**.
- **Tic Tac Toe**: Developed a two-player game in **React**, utilizing **state management** (useState) for game logic and **React hooks** (useEffect) for real-time updates, tracking winning patterns and **triggering animations** to enhance **user engagement**.
- **Random User Generator:** Built a React app that integrates with an external API to fetch and display user profiles, implementing **dynamic data fetching**, a **refresh feature** for updating user information, and a **custom loader** to improve the user experience during data retrieval.
- **World countries**: Built a country information web app using **REST API integration** to dynamically fetch and display data, leveraging **asynchronous JavaScript** (fetch()) for data handling and error management.
- **Focus on Today:** Developed a task management productivity app with **local storage** for data persistence, implementing features like **task prioritization** and **state management** using **vanilla JavaScript.**

Education

- **Master of Business Administration (MBA)** **2022**
  BBD University, Lucknow
